DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-13, drawn to a method of preparing a blank.

Group II, claim(s) 14-28, drawn to a blank.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: claim 14 is either obvious over or anticipated by EP 1245325A, WO 02/070186 and JP11047859 accordingly, the special technical feature linking the two inventions, the blank comprising a parent body and an insert joined thereto by means of friction stir welding, at least one of the parent body and the insert being made of a material which has superplastic properties, does not provide a contribution over the prior art, and no single general concept exists. Therefore, restriction is appropriate.

3. Applicant is advised that the reply to this requirement to be completed must include an election of invention to be examined even though the requirement be traversed (37 CFR 1.143).
